Lorem ipsum dolor sit amet, ligula suspendisse nulla pretium, rhoncus tempor placerat fermentum, enim integer ad vestibulum volutpat.

- (1) a. Phonetics: [fə'netɪks]  
b. Semantics:  $\llbracket \textit{Bill likes her}_2 \rrbracket^{w,g} = 1$  iff Bill likes  $g(2)$  in  $w$

Lorem ipsum dolor sit amet, ligula suspendisse nulla pretium, rhoncus tempor placerat fermentum, enim integer ad vestibulum volutpat.

- (2) weil das ein deutscher Verbendsatz ist (Lenerz 1977)  
*because this a German verb final sentence is*  
'because this is a German verb final sentence'

We strongly recommend the use of **qtree** (which is loaded by default) or, alternatively, the more powerful **tikz-qtree**. A simple example:

- (3) a. This is a simple tree  
b.
- 
- ```
graph TD
    S --> This
    S --> VP
    VP --> V
    VP --> NP
    V --> is
    NP --> simple_tree["a simple tree"]
```

Lorem ipsum dolor sit amet, ligula suspendisse nulla pretium, rhoncus tempor placerat fermentum, enim integer ad vestibulum volutpat.
